Wynn Beauty & Health announces product design collaboration with artist Jamie M. Lee

Wynn Beauty & Health is pleased to announce a product design collaborative project with Jamie M. Lee. Her custom designs are featured on our Prebiotics7 Skin Vitalizing facial spray and on our upcoming products.

Korea-born, New York-based artist Jamie M. Lee has exhibited her art work internationally. Her colorful, dynamic and organic paintings have been featured in the MoMA PS1 gallery in New York, Young Eun Museum of Contemporary Art, Gyeonggi-Do, S. Korea, and numerous other galleries around the world.

Jamie M. Lee: "My intent is to create an emotional language with a rich vocabulary of imagery emerging from personal memories and dreams as abstract painting. My work evolves without sketching or preconceived designs, which results in a spontaneous and forceful effect. The images are transferred on canvas or paper as a story between reality and the subconscious. Curved lines and straight lines intersect, background and image coexist, and drawing and representation merge in a painting, creating an illusion."

About Wynn Beauty & Health: Wynn Beauty & Health is a social membership company. We strive to gather a community of members who are interested in skin clinic services, cosmetics and medical services while we offer the opportunity for personal financial benefits. Our main objective is to provide benefits for our members in many different ways. With our exclusive line of cosmetic products, members are able to purchase from anywhere at the same price at any time.
